Sumeru Innovation X

A program based on the Powerful Innovation and Entrepreneurship Framework developed at the SCET at University of California, Berkeley.

Entrepreneurship

Innovation

Mindfulness

Exclusive National Strategic Education and Training Partner

Everywhere else, the model has been done backwards. Students usually take a set of classes and then apply the courses towards a cookie-cutter problem. At Sumeru Innovation, we start with real-life, broad problems or challenges. Every aspect from the support courses, mentor networks, processes, and learning activities now revolves around the student's inspiring problem. You will be able to create new friends, colleagues, and professional networks while working on a real-life innovative challenge.

Sumeru Innovation X is for technical professionals and innovators, this program explores key management and leadership concepts relevant to technology-dependent enterprises. Class participants undertake intensive study of actual business situations through rigorous case study analysis. Selected content from this course is based in part on the in-person executive-level Engineering Leadership Professional Program offered by UC Berkeley's College of Engineering through the Sutardja Center for Entrepreneurship & Technology. Topics include Innovation leadership framework (tactics, culture, leadership); strategy and core competencies; tactics, execution, and business design for new projects; case studies of Zappos, Dropbox, Intel, E Ink, and Dr John's.

How emerging tech is revolutionizing career choices in India?

- 1** The Career Conundrums: Identifying Your Career Hurdles
- 2** Emergence of Entrepreneurship with Emerging Tech
- 3** Talent And Demand Supply Gap

The Career Conundrums: Identifying Your Career Hurdles

Changing working environment, opportunities in new technologies, potentially marketable products leveraging the emerging technologies – How is the technology world shaping up?

- Which industry should I look for a job in?
- How do I get placed in an organization working in an area of my technical interest?
- What are my peers pursuing - should I pursue the same or explore potentially better opportunities?
- Which industries and technologies are offering a scope for better career opportunities - how are industries shaping w.r.t emerging technologies?
- Should I acquire a new skill? Which one and why?
- Which skills are in focus in the current technology landscape?
- Is there a program available which will help me acquire the skills in demand?

Entrepreneurship?

- Is there a startup or a venture ecosystem available in India?
- How can I connect with mentors who can guide me in my entrepreneurial journey?
- How can I contribute to "Make in India" by creating a new Intellectual Property?

Opportunities?

- Are there new doors open for entrepreneurship?
- Has there been tech-enabled growth?

Is Upskilling in Emerging Tech, Leadership & Entrepreneurship the Answer?

Is there a platform which can fast-track my up-skilling journey?

Emergence of Entrepreneurship with Emerging Tech

With the emerging technologies at the forefront, possibilities are limitless. How can one adapt to these changes? Acquiring skills in emerging technologies and gaining industry insights to enable innovative IP creation to solve global challenges is the answer.

India's growth story is fueled by tech, enabling organizations across verticals towards tremendous growth. This growth has not only led to a rise in start-ups but also propelled the growth of significant employment opportunities across the industry verticals.

Consumer Led Digital Leap

Sumeru Innovation: Our Core Values

Our vision is to empower the youth of the nation with the right skill set to help them unleash their true potential while at the same time creating a tech and innovation based ecosystem that will nurture, foster and accelerate the growth of entrepreneurs.

We aim to build leaders today so that they can lead the future tomorrow.

Sumeru Innovation has partnered with the Sutardja Center for Entrepreneurship & Technology at the University of California, Berkeley to create and aggregate talented individuals and advanced resources to offer solutions and thought leadership to our clients.

Sumeru Innovation X program is designed, developed and will be jointly delivered by UC Berkeley’s Sutardja Center for Entrepreneurship & Technology (SCET) using the frameworks of the Berkeley Method of Entrepreneurship and Berkeley Method of Innovation

IIEduTech (IIEPL) is the Exclusive National Strategic Education & Delivery Partner for delivery of the certification/program across India as an initiative to promote and revolutionize technology-based innovation and IP creation.

Program Objectives

Our panel of distinguished faculty, lecturers, entrepreneurs, and tech experts from UC Berkeley and Silicon Valley will be mentoring the talents with an assortment of both recorded and online live classes, lectures followed by graded assignments, one-on-one performance analysis sessions with the faculty and live office hour.

Identifying and evaluating new opportunities

Improving project conceptualization and technical leadership

Develop critical thinking, problem-solving attitude and an open mindset

Correlating innovation projects to business strategies

Developing a supportive ecosystem for innovating projects

Building a Winning Team

Opportunity Recognition & Market Validation

Story and Execution - Pitching with NABC

Venture ecosystem

Go-to-Market and Value Extraction

Research-based Entrepreneurship with Leadership

Innovation Culture

Concepts of Core Competence, Technology Strategy

Program Outline

Duration

3/6/9 Months

Mode

Online / Hybrid

Core Streams

Technology

Entrepreneurship

Mindfulness

Technology Electives

- Computer Science and Backend development
- Computer Science and Frontend web development
- Augmented Reality, Virtual Reality & Visual Collaboration
- Full stack web development - With specialization in AI/ML
- Linux programming, Advanced Algorithms and Blockchain

Innovation Leadership

The learning from a decade of success with SCET at UC Berkeley's Method of Innovation Leadership is integrated within the program and includes Harvard case studies for a broad experiential view of the issues to be managed.

Behaviour & Mindsets

Innovation Engineering concepts developed at SCET, UC Berkeley and taught at leading technology firms like Google, Apple, Samsung, Cisco, Bosch, Applied Materialism, Yahoo, PayPal, Volvo, and many other cutting-edge companies.

Science of Happiness

Ancient wisdom contextualized to modern realities and practice breathing techniques. This will allow individuals to eliminate stress, enhance efficiency and productivity levels, and achieve work-life balance.

Capstone Project

A fully integrated, open-ended, real-life innovation project in the area of the selected technology elective. This project is a centrepiece that integrates theory, networks of people, business, process and innovation mindset. From the Data to Decision programs, and business analytics, the program will culminate with a capstone project solving complex problems.

For Whom

- Specially designed for Science, Technology and Engineering students & graduates with some coding background to further their career in emerging tech. or to establish a start-up.
- Management students & graduates with an innovative idea and looking for entrepreneurship concepts and/or building a technical team.
- Corporates and other organizations looking to reskill/upskill their employees in emerging tech. to take up leadership positions

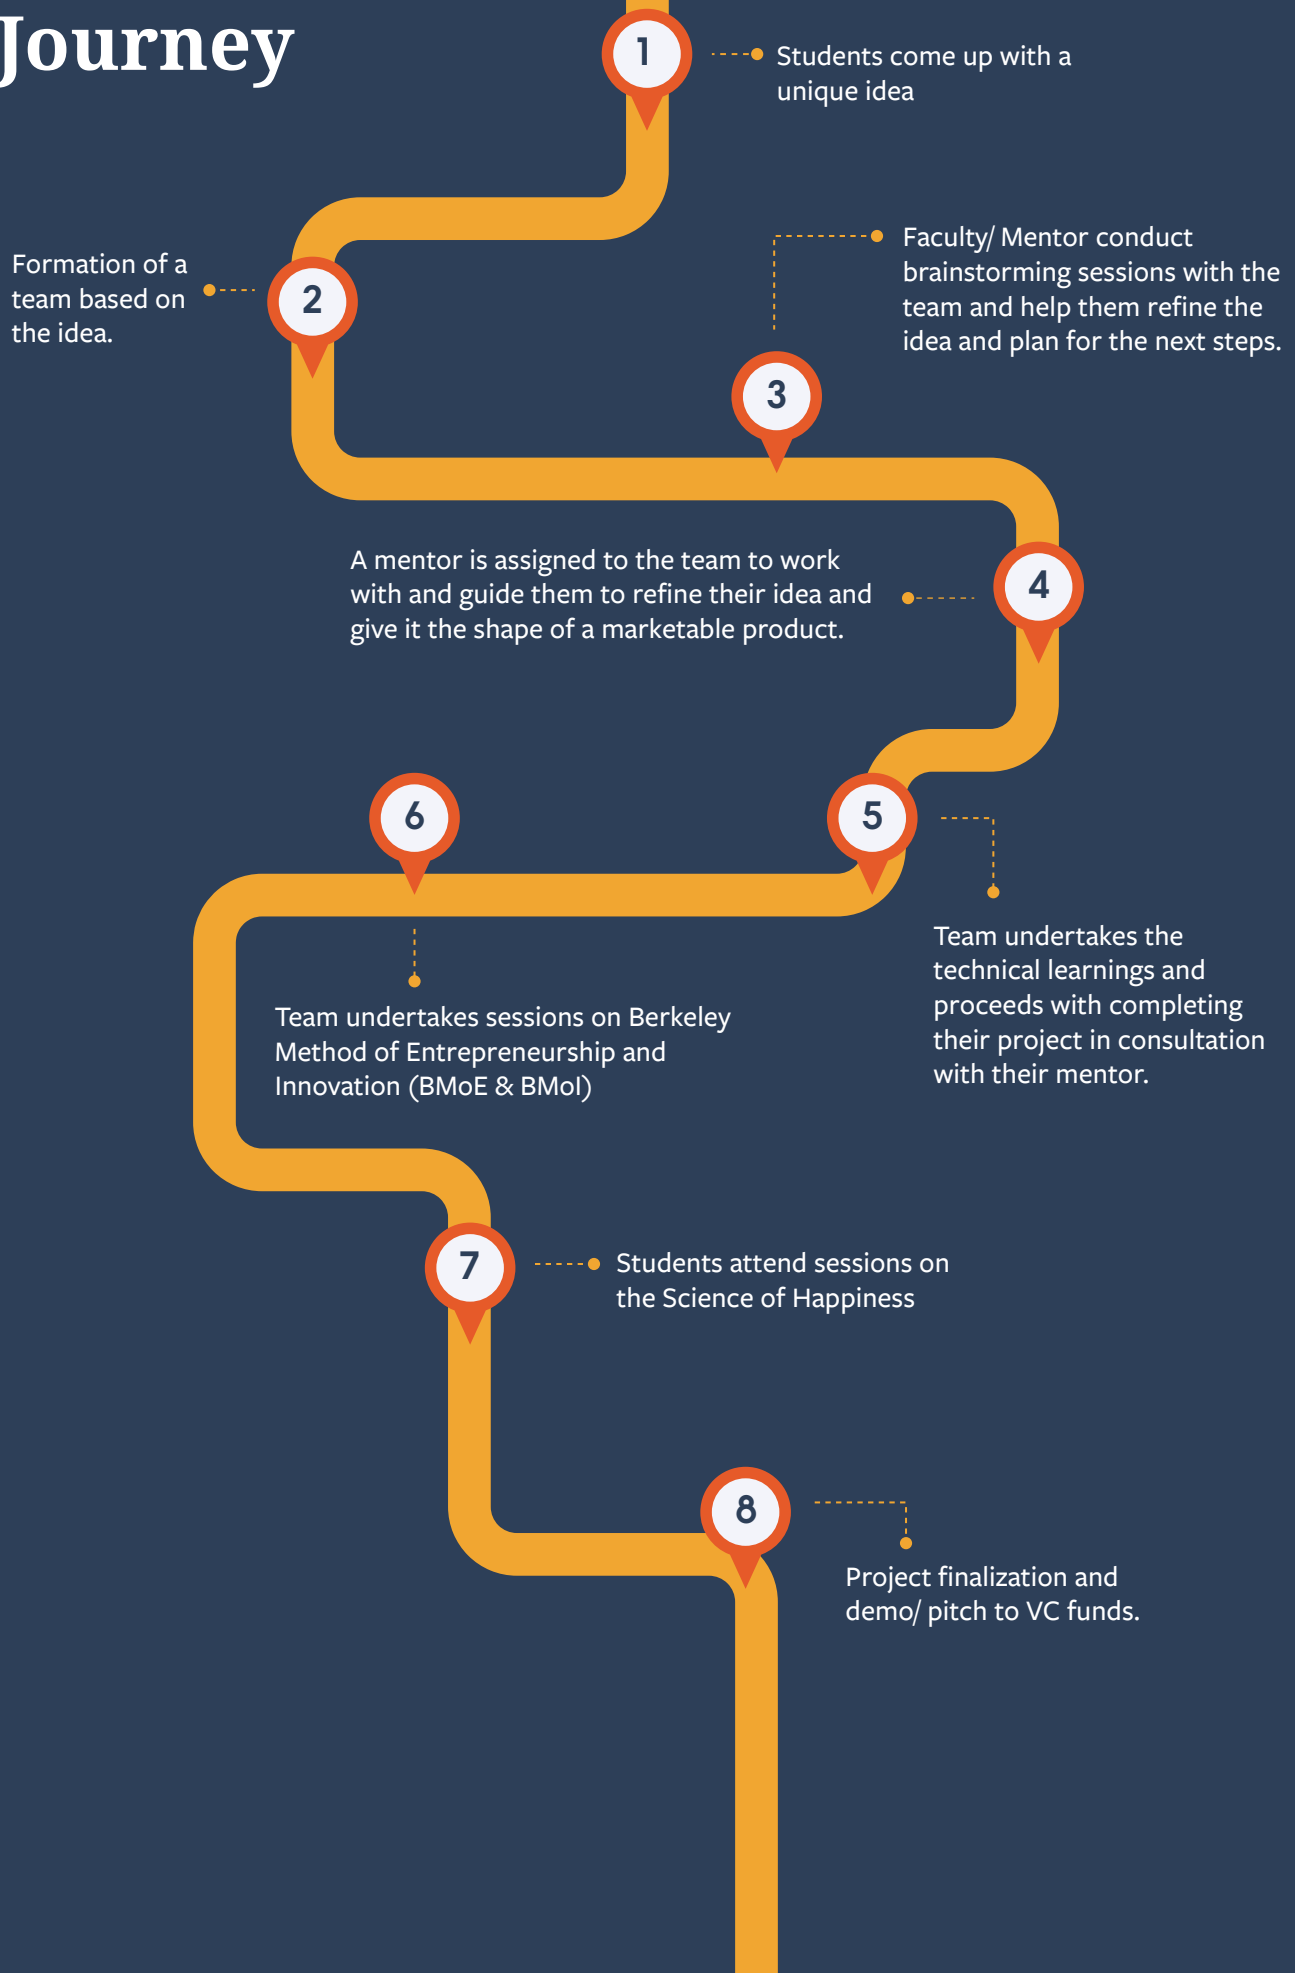

In less than 10 years, half of all the new cars sold globally will be electric. "Profound implications for the climate, but also auto and energy companies. Many industries are existentially threatened. Innovate or die, the 21st-century mantra

Shri Uday Kotak

CEO Kotak Mahindra Bank

Learning Journey

Why are we the right upskilling partners?

Bridging the Gap

Specially designed curriculum to bridge the gap between theory and practice.

A COMPLETE END TO END DIGITAL ECOSYSTEM FOR SKILLS IN EMERGING TECHNOLOGIES, ENTREPRENEURSHIP, INNOVATION AND MINDFULNESS.

Instructors from Industry

Experienced educators including instructors with experience at top-tech companies

Global Ecosystem

Our ecosystem is supported by VC Funds, Incubators, Universities, Colleges and Corporates

Cutting Edge Curriculum

Designed by professor Ikhlaz Sidhu at SCET, UC Berkeley in collaboration with industry leaders

Earn Certificate by SCET at UC Berkeley

On successful program completion, students will receive certificate from Sutardja centre for entrepreneurship and technology SCET UC Berkeley.

Powerful Support Network

Global network of executives, professionals and leaders including faculty of SCET at UC Berkeley, Entrepreneurs, and Venture Capitalists from Silicon Valley

Startup Funding & Incubation

Chosen projects may receive seed funding and support to pursue their idea further

Mentoring Cohorts

Large Pool of Mentors from the Industry across the globe, to support students in their learning journey.

Partner VC Funds

Sumeru Global Digital Technology Fund
United States

More than 10 partner VCFunds to support the innovative product's start-up journey.

How will this Program set you apart from your peers?

- 1 Unlike Any Experience you have ever had
- 2 There's More
- 3 Certificates

Unlike Any Experience, You Have Ever Had

Bring your ideas and objectives into an integrative project

It can be used for everything from starting a new venture to interviewing with industry leaders.

Create Your Reference Network

Don't try this alone. From online videos to in-person coaching sessions, allows future technical leaders to get started in new career directions.

Efficient, Tried & Tested

Unlike other online courses, Sumeru Innovation X is not lengthy in terms of its duration, user-friendly with the program structure, rigorous with regular assessments, practical with intense hands-on experience and above all customized and oriented as per the requirement of the applicant.

Develop broad and deep capabilities

Learn technically deep skills needed for technology positions and new ventures. Also learn the broad, business-oriented skills and behaviours needed for career success.

There's More

The students, entrepreneurs and talents enrolling for the program get access to some of our handpicked and trademark content curated and crafted by Sumeru to add those finishing touches to their reskilling/ upskilling journey. From funding to inculcating life values, ethics, leadership and creativity, we leave no stone unturned in facilitating you acting as the change-makers and visionaries.

About SCET at UC Berkeley

#2 University in the World for Entrepreneurs.

Sutardja Center for Entrepreneurship & Technology at the University of California Berkeley and Sumeru has engaged advanced resources to design and develop cutting edge programs and certifications to augment accelerated learning and skill enhancement for the participants.

- **Developing Entrepreneurs and Innovators:** SCET emphasizes hands-on learning, offers a suite of courses, programs and Certificate of Entrepreneurship & Technology.
- **Global Innovation Collider:** Programs such as Global Partners at UC Berkeley, Global Venture Lab, Berkeley Method of Entrepreneurship Bootcamp and Start-up Semester create rich interaction among the students and professors around the world to spur the growth of ideas into ventures.
- **Driving Future Technologies:** SCET's Innovation X initiative allows students & professionals to discover the "Future of X."

The Sutardja Center, where entrepreneurship and technology collide.

"SCET has created a base of Berkeley entrepreneurship ecosystem including the likes of SkyDeck, the Fung Institute and Global Venture Labs thereby, creating an extensive ecosystem of Silicon Valley and Global Partners. To thrive in this innovative ecosystem, the Sutardja Centre also collaborates with Jacob's Institute for design, the Haas Business School and the CITRIS Foundry."

Berkeley Method of Entrepreneurship Fundamentals

Designed for aspiring technical leaders and innovators, the program introduces participants to the concepts of technology innovation and entrepreneurship.

The program is designed, developed and will be jointly delivered by UC Berkeley's Sutardja Center for Entrepreneurship & Technology (SCET) using the frameworks of the **Berkeley Method of Entrepreneurship (BMoE)** and **Berkeley method of Innovation (BMol)**.

The globally recognized BMoE and BMol emphasizes the mindset, behaviour and skills required to become an Intellectual Property Creator and a successful innovator.

How will the Berkeley experience help you kickstart your professional journey

UC Berkeley's BMoE and BMoI

Berkeley Method of Entrepreneurship and Innovation is to help hone your leadership and entrepreneurship skills and to also help create an innovative mindset to create new product offerings and generate Intellectual Property.

Emerging Technology

Training on the most productive emerging technologies to help create your product or offering to be the best of the world

Mindfulness

From The Art of Living Foundation to help maintain the balance between work, personal life and staying motivated.

Ecosystem

A self-sustainable model supported by mentorship by global leaders and VC Funding opportunities.

Employment

The program will also help you with the necessary skills required to hone and succeed in a tech management role in an organization.

Certifications in emerging technologies from prestigious globally renowned universities help students find positions in globally leading organizations and/or develop superior products or services.

Opportunity to Study at SCET, UC Berkeley

STARTUP SEMESTER PROGRAM, SCET AT UC BERKELEY

The Start-up semester emphasizes hands-on venture-building. Using the Berkeley Method of Entrepreneurship, will help you grow your network, find your new team, and immerse yourself in the dynamic Berkeley and Silicon Valley ecosystem.

BERKELEY METHOD OF ENTREPRENEURSHIP BOOTCAMP

The Bootcamp facilitates immersive learning for new venture creation. This workshop offers a one-of-a-kind experience in one of the premier institutions in Silicon Valley. During the program, participants will attend sessions that weave together lectures and interactive game-based exercises, receive one-on-one mentoring from Sutardja Center faculty and industry experts; and learn in a collaborative environment.

VISITING RESEARCHER PROGRAM

Entrepreneurial focused researchers and research teams may come to UC Berkeley to conduct applied research aligned with SCET X-Lab focus areas: Data Science, Sustainable Foods, and Blockchain. The Center also considers applicants interested in entrepreneurship education.

Companies become Global Leaders by early adoption of Emerging Tech

Do you know about the Google Brain Project?

Google first explored the possibilities of deep learning back in 2011, with the Google Brain project. The next year, the company announced that it had managed to build a neural network that could simulate human cognitive processes. Running on an incredible 16,000 computers, the system studied 10 million images and learned how to identify a cat in a photo. It may not sound that exciting, but it was a big leap in deep learning. Today, Google offers a bouquet of products using AI, ML including Waymo, Google's self-driving car division, Google Adwords, Doubleclick, Google Home etc.

(Source: bernardmarr.com)

Artificial intelligence will be the ultimate version of Google. The ultimate search engine that would understand everything on the web. It would understand exactly what you wanted, and it would give you the right thing.

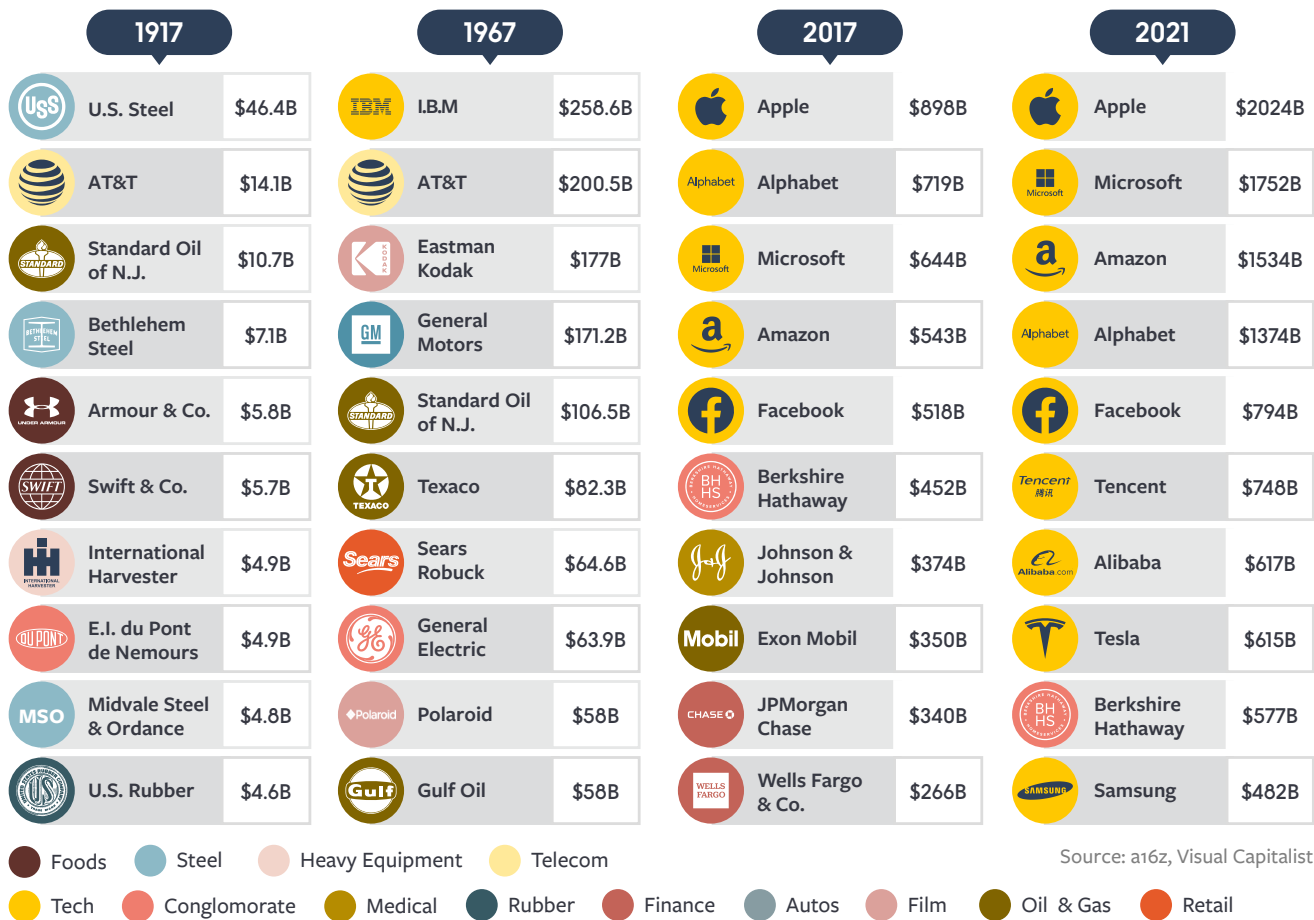

Larry Page

Co-founder and CEO, Alphabet Inc. 'Google'

Does early adoption of emerging technologies reap rich benefits?

Emerging technologies offer an opportunity even in situations leading to dramatic changes in the domestic and global economies. Tough economic and business conditions from March'19 onwards has demonstrated the advantage of adopting technologies which has resulted in significant growth and increase in market capitalization across industries.

The early-tech movers dominate the market

Source: theprint.in

iDEX: Innovation for Defence Excellence is a startup support program initiated in India by Ministry of Defence to facilitate domestic development of military software and hardware. The Scheme with budgetary support of Rs 498.8 crore for iDEX aims to support 300 startups and 20 partner incubators over next five years to produce functional prototypes and foster innovation in Defence.

The Union Defence Ministry has decided to earmark around 64 per cent of its modernisation funds under the capital acquisition budget for 2021-22 — a sum of over Rs 70,000 crore — for purchases from the domestic sector.

Source: theprint.in

Change in market capitalisation of current Global Top 100

(March 2020 - March 2021)

Looking beyond the dislocation caused by the initial outbreak of COVID-19, the market capitalization of the Global Top 100 companies has increased by a remarkable 51% between March 2019 and March 2021, compared to an increase in the MSCI World Index of 33%. Led by the US, this highlights the ability of the largest companies to leverage technology and grow at scale over this period, breaking away from the growth trend line over the past decade.

Ross Hunter

IPO Centre Leader, Partner, PwC United Kingdom

Without a robust and resilient innovation strategy, no company can survive.

Phil McKinney

CEO of CableLabs

Industries utilizing technologies have registered a strong recovery despite the economic crash caused by the pandemic; not just recovering rather thriving and growing like never before - all powered by technology.

Technologies are here to stay, up-gradable as per new problems identified that need to be solved.

- The global artificial intelligence market is valued at USD 22.59 Billion in 2018 and expected to reach USD 357.26 Billion by 2025.
